Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication:
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hedenberg in view of Miller.

There is disclosed in Hedenberg a bread maker, comprising: a main body 2; and oven (interior heating chamber) accommodated in the main body; a baking tray 25 placed inside the oven and formed with a profile groove (not labeled, see figure 3), the tray comprising a stationary tray 28 and a moveable tray 26; and a profile 40, 42 combined in the profile groove of the baking tray.

Miller discloses a peripheral groove 14 having a rectangular cross-section for supporting a cylindrical gasket 20, the groove including flanges (protrusions) 19 for retaining the gasket within the groove.

It would have been obvious to one skilled in the art to provide the profile groove of Hendenberg with the flanges (protrusions) taught in Miller, in order to help retain the profile within the profile groove.

In regards to the method of forming the protrusion on the groove, such is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

Art Unit: 1761

In regards to claim 13, it would have been obvious to one skilled in the art to modify the shape of the Hendenberg groove with that taught by Miller, in order to provide an alternative shape for the groove.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Jain et al. and Vassallo et al. are cited for there disclosure of a retention protrusion within a support groove.
